

EffiDiag

Preventive maintenance adapted to all your vehicles and equipment

Do you know one of the following challenges with your vehicles:

- Premature wear of tires and brakes?
- Frequent and unexpected breakdowns?
- Excessive fuel consumption?
- Increased maintenance costs?
- Decreased life span?

EffiDiag is the answer

Thanks to the **EffiCube** platform installed on board **all the preventive maintenance data specific to your vehicles can be read**, transmitted and processed for analysis.

The strength of EffiCube is unlocking **all useful data**. It can be the rate of use (mileage and duration), engine temperature, engine speed, idle stability engine speed, braking or acceleration intensity, data from equipment, other accessories and from tires.

All of this data is analyzed and shown in the form of **simple reports** and summary indicators or even alerts. It is now possible to **plan your maintenance operations better vehicle by vehicle**.

Effitrax
Unlocking smart data

EffiTrax is a **Belgian company** created in 2017 by **Belgian and French experts in transport, heavy vehicles and telematics**. The idea emerged out of an observation: the current telematics systems are too complex, closed, not scalable and not adapted to the accelerating technical changes.

EffiTrax's mission is to simplify the lives of fleetowners, OEMs and other Telematics users by offering them a **universal vehicle connectivity platform**.

Choosing EffiTrax is choosing a **guaranteed permanent access to data from all your vehicles and the benefit of a connected fleet**.

Unlocking smart data

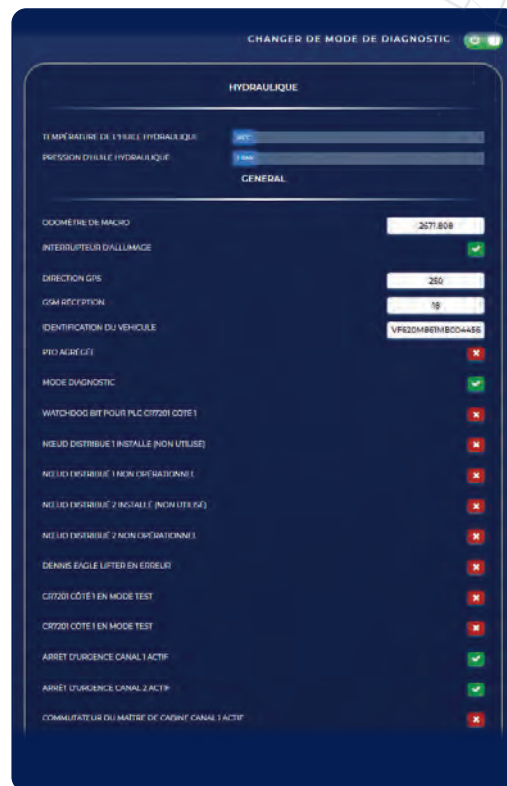

EffiDiag

Who is it for ?

- All fleet managers, responsible for maintaining and organising operations on vehicles in the best possible way.
- All financial managers concerned with reducing the TCO of their fleet.
- All manufacturers or equipment suppliers or leasers who want to monitor the use of vehicles by their clients and offer them new services.
- All telematics integrators who do not have the necessary data for this application.

For what vehicles ?

EffiDiag is **particularly suitable for special vehicles**: refuse collection vehicles, truck mixers, compactors, coaches, crane trucks, sweepers, etc...

What are the advantages for your clients?

Choosing EffiDiag means benefiting from tools that will ensure you :

- Maximising the availability of your vehicles
- Reducing maintenance and repair costs
- Extended life of your vehicles
- Reduced fuel consumption with better maintained vehicles
- Improved safety for personnel
