

EffiSave

Eco-driving adapted for heavy vehicles

Are you facing these challenges:

- Is your **fuel bill constantly increasing?**
- Does **the consumption** of your vehicles seem too high?
- Are you facing a **fuel theft issue?**

EffiSave brings you an innovative answer

EffiSave is enabled by the EffiCube embedded platform which **provides access to all the necessary on-board data: consumption, fuel gauge, engine load, rpm, etc...** These data are collected in **real time**, second by second and available in the vehicle and on the cloud.

The EffiTrax visualisation and analysis tools can then **identify moments of over-consumption and determine the actions to be taken to improve.**

EffiTrax offers field support with its specialists to set up a dedicated eco-driving programme. This programme has already proven its worth with customers, **enabling them to save up to 10% on fuel costs.**

Beyond technical aspects, EffiTrax support change management issues to ensure sustainable savings.

 **Effitrax**
Unlocking smart data

EffiTrax is a **Belgian company** created in 2017 by **Belgian and French experts in transport, heavy vehicles and telematics.** The idea emerged out of an observation: the current telematics systems are too complex, closed, not scalable and not adapted to the accelerating technical changes.

EffiTrax's mission is to simplify the lives of fleetowners, OEMs and other Telematics users by offering them a **universal vehicle connectivity platform.**

Choosing EffiTrax is choosing a **guaranteed permanent access to data from all your vehicles and the benefit of a connected fleet.**

Unlocking smart data

EffiSave

Whom is EffiSave for?

- All the fleet managers who are motivated to reduce the cost of using their vehicles.
- All financial managers who want to reduce the TCO of their fleet.
- All HR managers who wish to engage their employees in a cost-saving approach.
- All telematics integrators who do not have the necessary data for this application.

For what vehicles?

EffiSave is particularly suitable for specialty vehicles: refuse collection vehicles, truck mixers, compactors, coaches, crane trucks, sweepers, etc...

The configuration interface is divided into several sections: 'General' with a dropdown for 'Début de la semaine:' set to 'Lundi'; 'Notation Conducteur' with sliders for 'Points Accélération:' (190), 'Points Freinage:' (330), 'Points virage:' (160), 'Points Accident:' (500), 'Points de marche au ralenti:' (0), and 'Points d'excès de vitesse:' (0); 'Temps minimum de marche au ralenti:' (15 minutes) and 'Temps minimum d'excès de vitesse:' (5 minutes); 'Base de Notation:' set to 'Basé sur la distance'; 'Evaluation Conducteur' with a color scale for 'Couleur d'évaluations:' (1000 - 1500); and 'Adressage' with checkboxes for 'Point d'intérêt' (checked), 'Zone Interdite', 'Géo-clôture', and 'Domicile conducteur'.

What are the benefits?

Choosing EffiSave means benefiting from a service that not only allows you to reduce your fuel costs, but also to engage drivers in a proactive approach.

Thanks to EffiSave you will benefit from:

- A significant reduction of your fuel costs with the associated economic impact
- A reduction of your CO₂ impact
- A reduction in the number of wrong claims
